

# SFP26998

## Single Valve Controller

### Function

- The SFP26998 is a packaged control module designed to remotely operate the Source Fluid Power Motorized Control valves that are equipped with (S) series electronics.
- The molded black flame-retardant ABS housing contains the command potentiometer, a panel mount fuse holder, strain reliefs for connecting cables and a lighted rocker switch.
- Surface mounting flanges for easy in cab mounting.

### Applications

- This package is ideally suited for applications where you want to vary the rate of a hydraulic actuator and start/stop the actuator without having to operate the potentiometer.

### Specifications

- Housing, black flame-retardant ABS
- Supply Voltage, 10-28 VDC
- Reverse polarity protected
- Power lead 6 feet long, flying leads
- Motor lead 18 inches long with a 6 pin Weather Pack Shroud Connector
- Lighted rocker switch indicates unit on
- Panel mount fuse holder, twist to release, 3 amp slow blow fuse
- Plastic 0-10 control knob
